- HTML, CSS, Vanilla JS
- CSS Grid & Flexbox
- Responsive Web Design
- Express.js
- Node.js
- Vue.js
- Mongoose
- MongoDB
- SQL
- Object Oriented Programming
- DOM manipulation
- jQuery
- AJAX
- React and JSX
- React Components, Props, and State
- React Hooks
- Python

Relevant Experience

General Assembly – Fellow, Remote, Chicago, IL January 2022 – Present

Completed 500+ hours of expert led instruction in full-stack software engineering with hands on learning of computer science fundamentals and the industry's most in demand technologies to develop:

- **Personal Portfolio Site:** Worked with a local UX/UI designer on three iterations of my personal portfolio. Initially developed with HTML, CSS, and jQuery. Refactored into a react app for future iterations. Deployed with Github Pages, and utilized Git for version control. [[REPO](#)][[Deployed Link](#)]
- **Galaxy Trading Cards:** Multi-page React app using React Bootstrap, HashRouter, and NASA's API for images/videos. Developed Javascript algorithm to make a selection randomly from returned array with 18 pages and 1774 objects that users can save to a separate page. [[REPO](#)][[Deployed Link](#)]
- **CookBooker:** Full stack application built in two days with MongoDB, express, and deployed on Heroku. Allows users to interact with the ReactJs frontend to add their favorite cookbooks and authors for others to view. [[Repo-FrontEnd](#)][[REPO-BackEnd](#)][[Deployed Link](#)]
- **Hey, Neighbor:** Worked on team of four engineers to develop a MERN stack application in a 4 day sprint. Took turns as project manager, resolved merge conflicts, and utilized GitHubs kanban to set and manage assignments. App allows users to create listings for items for rent, and communicate through comments. [[REPO](#)][[Deployed Link](#)]

TTSG – Senior Account Executive, River North, Chicago, IL – Feb. 2018 – Mar. 2020

- Promoted to senior after closing over \$600k in new business as a first year rep
- Managed 20 clients in finance, manufacturing, and real-estate to implement managed print cost-savings from 10-15%
- Investigated inefficiencies, conceptualized wasted worker time soft-costs for C-suite, and introduced process improvement plans for client workflows ranging from 10 employee teams to multi-departmental national corporations with over 1000 satellite locations
